## GIST OF SOME LAWS GOV- ERNING MOTOR VEHICLES

It is a great mistake to think that the law is a mere collection of rules and regulations. It is a living thing, and it grows with the times. The law is a guide to the people, and it is the duty of the government to keep it up to date. The law is a shield for the people, and it is the duty of the government to keep it strong.

It is a great mistake to think that the law is a mere collection of rules and regulations. It is a living thing, and it grows with the times. The law is a guide to the people, and it is the duty of the government to keep it up to date. The law is a shield for the people, and it is the duty of the government to keep it strong.

## MOVING PICTURE SHOW AT W. O. TUCKER'S GARAGE

A moving picture show which proved to be interesting, instructive and profitable was given at W. O. Tucker's garage last evening. The show was given by the Marion High School. The show was given by the Marion High School. The show was given by the Marion High School.

## FULLY VATES ON CAMPING TOUR

Evangelist W. B. Vates left Tuesday for Blackwell, Okla., to lead the young at the State Campmeeting. He will be accompanied by a company of evangelists. He will be accompanied by a company of evangelists. He will be accompanied by a company of evangelists.

## AN OLD PICTORIAL

Mr. Al Dean of the Forest Grove school reports that he has on his farm one of the first steel pitforks ever introduced in the county. The pitfork was purchased by his father, Alexander Dean, in 1861 from a flat boat coming down the river from Pittsburg, Mo. It is still in a good state of preservation and has been in use on his farm for 60 years.

## SOME FINE APPLES

Mr. Sam Hunt, residing a few miles east of town, brought to this office a couple of very fine apples as specimens from his orchard. One of the apples measured 11 1/2 inches around one way and 12 1/2 the other way and weighed one pound. The other apple was about the same size.

## OLDEST MASON DIES

W. W. Noel, aged 100, the oldest Mason in the state, died at Shelbyville Tuesday. He celebrated his birthday in March. He was twice married and outlived all his immediate relatives.

## A GOOD OLD PROSPERITY

Mr. E. M. Eaton, in digging a well on his farm near town, discovered what has been presumed good evidence that oil underlies the earth in that locality. The well is only 12 feet deep and the water and the oil surface thereabout have a very oily appearance. Mr. Eaton took some of the oil and put it in a glass. It was a very good oil.

## A FINE POTATO PATCH

Mr. Henry Swansy, who resides in the Marion High school, has a potato patch that is hard to beat in the district. He dug from one hill the other day 80 potatoes, some big, some medium sized. Mrs. Swansy might be called a potato grower from potatoes.

## A BIG CUCUMBER

W. B. Vates of this city evidently knows how to raise cucumbers as well as how to dig and to press the Gospel. Two or three cucumbers were shown to the press. One was a "watermelon" and was fourteen inches long and one and one-half inches in diameter. It weighed one and one-half pounds. Can you beat it?

## FRIENDS ENTERTAINED

On Sunday of last week after the services of Helton church, a number of friends were entertained at the home of Mr. and Mrs. John Vaughn. Courses were laid for fourteen. Those present were: Messrs. Arel Vaughn, Harperr, Lyle Thomas, Olie Thomas, Mattie and Bertie Lindsey and Dave Hurley. Rev. O. M. Capshaw, Messrs. George Herrin, Walker Cook, Virgil Cook, Gray Hurley, R. Herring, John Thomas and Lucy Cook.

## A CARD OF THANKS

I desire to thank each and every one for their kindness shown me and my loving husband in his last illness and especially for the beautiful floral offering and their kind and comforting words. May God's richest blessings ever rest on them.

MRS. ALA MATLOCK

## PRESBYTERIANS TO BEGIN CANVASS SOON

After several weeks of preparation by the Presbyterians of Kentucky the actual canvass among the churches in this section for \$1,000,000 for Christian education will begin. It is planned to visit every church in the state and representatives from headquarters will shortly hold a conference with the Presbyterians and church officers for the appointment of local committees and other detail work. The cause will be presented in the pulpits by the local pastors and by representatives from Louisville.

## UNION SERVICE SUNDAY

There will be a Union service Sunday of the Presbyterian church U. S. and the Presbyterian church U. S. A. to be held at the Main Street Presbyterian church when Dr. Baird of the Presbyterian church U. S. will deliver a sermon on Christian education. Dr. Baird represents the joint board of the two churches on education which have recently united. Every member of both the U. S. and the U. S. A. churches are urged to come. Service to be at 7:45. All friends invited to worship with us.

## LETTER FROM ED COOK

London, Ky., July 1, 1922  
Dear Press:  
As I have been printed and heard much talk of a proposition to build a bridge across Tradewater river at the mouth of Cypress creek. Will say first. It looks like the taxpayers of Crittenden County have more to pay now than they will pay in the next ten years without taking up any new business. Let's finish what we have on hand now and get a little cash in our treasury then we can look after other things.

## ANOTHER BIG CARRIAGE WHEEL

Last week was published a description of a large wheel of carriage brought to this office by Mr. E. L. News, of this city, and it was pronounced a "whopper." This wheel, however, has been excelled in size and weight by one brought in by Mr. Bert H. Hunt, who resides a few miles north of town. Mr. Hunt's specimen measures thirty-nine inches in circumference, twelve inches in diameter and weighs sixteen and one-half pounds. Who comes next with a bigger one?

## GRAVEYARD CLEANING

The Kilpatrick graveyard will be cleaned off the first Saturday in August. All persons who are interested will meet there on that day. Bring tools to work with, also a basket well filled. A dinner will be served on the ground. There will probably be preaching during the day.

## JAMES PERRYMAN DIES

James Perryman, who fell from a catenary while at work in his field two weeks ago and seriously injured his spinal cord, died Thursday July 6 at his home in the Franklin Mine section about 60 miles west of town. Funeral services were held at the Marion High school by the pastor, Rev. T. C. Carter, after which the remains were laid to rest in the Union cemetery.

## TEACHERS' EXAMINATION

A normal teachers' examination will be held on July 24th and 25th at the Marion High school. One year high school and five weeks normal training will be required to enter this examination. There are still a few vacancies for teachers who obtain certificates. This will be the last examination until September.

## R. C. TUDOR DIES

R. C. Tudor, better known as "Little Hen" Tudor, died at the home of Charles Dempsey on Wednesday July 5, aged 70. Funeral services were conducted by Rev. W. T. Oakley in the lawn of Claud Nesbitt's residence in the presence of a number of relatives and friends. The remains were laid to rest in the Cain graveyard.

## CONFERENCE FOR SUN- DAY SCHOOL WORKERS

Miss Mary Virginia Howard, of Louisville will conduct a conference for Crittenden county's Sunday school workers. Friday July 14 at the Cumberland Presbyterian church. The morning session will be at 9:30 and the afternoon session at 3:00. Miss Howard represents the Kentucky Sunday School Association and she is particularly interested in work among young people. If you are a Sunday School worker, come, and especially do we urge the presence of all teachers and leaders of and among young people.

## STATE THROOPS ORDERED TO HOPKINS COUNTY

Gov. Morrow recently ordered troops to move from Hopkinsville and Livermore to Madisonville when county authorities at that place advised him of the situation at a strip mine there proved threatening and that local authorities would be unable to handle the situation, if trouble developed as they anticipated.

## JUNIOR WEEK AT LEXINGTON

After an interesting all-day ride on the train our party arrived at Lexington Sunday evening at 8:45. Sunday night Miss Morgan and Mr. Garstie met us at the station. Mr. Garstie took the boys to their dormitory and Miss Morgan took the girls to Patterson Hall.

## DEATH CLAIMS MRS. BIRHAM

Mrs. Della Birham died at her home near Crayne Monday July 3rd of typhoid fever. The deceased was a daughter of Mr. and Mrs. Willie Jennings.

## A CARD OF THANKS

We wish through the Press to express our grateful thanks to our many friends and relatives for the many kind words and deeds during the sickness and death of our beloved father, J. Frank Loyd.

## NEW RESIDENCE

Mr. J. C. Elder is building a handsome seven-room residence for Mrs. C. W. Perry on South Walker street. The house will be a one-story building with a veranda in front and a porch at the back. The house will be ready for occupancy about the first of August.

## THE OLIVE SWINNING HOLE

See "The Olive Swinning Hole" at Rex Theatre Thursday and Friday evenings. Benefit School Improvement Club. Admission 10 and 25c.

## CHILDREN'S DAY AT MT. ZION

Last Sunday was Children's Day at Mt. Zion church. An appropriate program was carried out in the forenoon, consisting of songs, recitations, addresses, etc. An interesting talk was given by the pastor, Rev. Richardson.

## STATE THROOPS ORDERED TO HOPKINS COUNTY

Gov. Morrow recently ordered troops to move from Hopkinsville and Livermore to Madisonville when county authorities at that place advised him of the situation at a strip mine there proved threatening and that local authorities would be unable to handle the situation, if trouble developed as they anticipated.

## JUNIOR WEEK AT LEXINGTON

## Farm Bureau Notes

### Hornworms Start Annual Raid on Tobacco Plants

Tobacco growers are facing the annual task of ridding their plants of hornworms, recognized as the worst insect pest of the crop according to H. H. Jewett of the Kentucky Experiment Station. The adults or moths appear from the first week in June to about the middle of August while the maximum number of worms are present in the field about August 15. The worms are so destructive that tobacco could not be grown successfully without the use of control measures.

### Hand worming cannot be relied upon to keep tobacco free from the worms even with the most careful examination of each plant while Par-

is is taken which formerly was used quite extensively to kill the pests to giving way to arsenate of lead. The latter material adheres to the plants longer than does Paris Green and therefore is more effective while it rarely injures the plants even when an excessive amount is used. This material has an added advantage in that it can be used during periods of unsettled or rainy weather.

The arsenate of lead is applied to the tobacco by means of a dust gun or cheese cloth sack. The old style guns are being replaced by those with fans ten inches or more in diameter and having special devices for preventing clogging at the outlet. When it is necessary to use an old style gun the arsenate should be mixed with an equal bulk of sifted wood-ashes. The dusting should be done when there is no breeze either in the morning when the dew is on the plants or in the evening.

Under average conditions from 3 to 5 pounds of the arsenate an acre is sufficient for one dusting. At least two dustings should be made while a third is sometimes necessary. When it is necessary to apply the poison as a spray from three to five pounds of the arsenate should be used to 100 gallons of water.

### The Junior Club Camp

Plans are progressing for the Crittenden County Junior Agricultural Club Camp at Chapel Hill. Already a number of the club members have signified their intention of going to the camp and are anticipating a great time at that affair. Crittenden and Union county will combine in this camp and make it one of the greatest affairs of its kind.

### DEATH CLAIMS MRS. BIRHAM

Mrs. Della Birham died at her home near Crayne Monday July 3rd of typhoid fever. The deceased was a daughter of Mr. and Mrs. Willie Jennings.

Funeral services were held at Chapel Hill Tuesday conducted by Rev. H. C. Paris and Rev. E. N. Hart after which the remains were laid to rest in the Chapel Hill cemetery. Mrs. Birham was a member of the Second Baptist church of this city. She is survived by her husband and a daughter, Ruth Jean, aged four months.

### A CARD OF THANKS

We wish through the Press to express our grateful thanks to our many friends and relatives for the many kind words and deeds during the sickness and death of our beloved father, J. Frank Loyd.

### NEW RESIDENCE

Mr. J. C. Elder is building a handsome seven-room residence for Mrs. C. W. Perry on South Walker street. The house will be a one-story building with a veranda in front and a porch at the back. The house will be ready for occupancy about the first of August.

Mr. Ellis Nesbit and wife  
to their home in Roselare.  
Miss Reba Fritz visited Miss

on Hilliard Sunday.  
Mr. L. Belt father and mother  
visited at his home Saturday.

**Had Sighed Over Cat's Hair.**  
My first love affair came to a climax when my sweetheart discovered that he had been carrying a "lock" of the cat's tail next to his heart for several months, under the illusion that it was a lock of my hair. He had insisted upon having a lock of my hair, but I, having none to spare, and feeling that the color matched exactly that of my red calf, substituted that. It answered the purpose very well until a small boy gave the secret away. Then I was denounced as a true daughter of Eve!—Exchange.

Subscribe for The Press.

#### LEVIAS

Miss Laura Leet, a trained nurse of Evansville, is nursing Mrs. Leet, who has been ill the past few days.

Mrs. Eva Allison is visiting her daughter in Marion.

Mr. Luke Mahan, wife and son of day, spent the week end with Fred Love.

L. E. YATES, Prop. Telephone 148

#### Illinois Central System Values the Good Will of Its Patrons

In the commercial world good will is one of the most valuable assets a business can have. In the valuation of industrial concerns it is frequently rated at many millions of dollars. We believe that good will is of great value to a railway system—in fact, we believe it is one of the most valuable assets a railway system can have.

We are constantly seeking to promote good will among our patrons for the Illinois Central System. We are doing it by attempting to render a dependable, efficient transportation service, by having officers and employees who are all courteous and obliging to our patrons, by giving our patrons accurate information in regard to the Illinois Central System, by cooperating with our patrons and seeking their co-operation with us through their constructive criticism and suggestions.

We have sought to create for this railway system, in the consciousness of our patrons, a personality embodying the highest ideals of public service. It is because of such ideals that we are constantly striving. It is our endeavor to be of constructive service to every community, every farmer, every business man, every industrial and commercial enterprise in the territory which we serve with transportation.

We have repeatedly appealed to our patrons to work closely with us to support us, not only with their business, but with their friendships, to furnish us with their constructive criticism and suggestions.

The Illinois Central System and its patrons are sharing in common problems. It is to our best interests to be ever mindful of the best interests of the territory we serve, and, on the other hand, we believe our patrons can best serve their own interests by doing that which will strengthen the Illinois Central System. Representatives of all communities of the Illinois Central System are filled with pride in their work and a desire to be of service to our patrons. They are striving to make every patron of this railway system a friend and a personal interest in the Illinois Central System.

We hope that the Illinois Central System will always stand at the front of the railroads of this country in having the good will of its patrons. We feel that we strive to serve for the full measure of support and confidence accorded us in the past, and we shall have nothing to show for our part their continued support and confidence in the future. We feel that the good will of our patrons is of added responsibility upon us to serve them well, and we accept that responsibility, pleasant that we are able to contribute to the upbuilding of a great and fruitful territory—the Mississippi Valley.

Criticism and suggestions are invited.

C. H. MARKHAM,  
President, Illinois Central System

Prepared by the United States Department of Agriculture

Greater standardization of practice in the design and construction of highway bridges is urged by the Bureau of Public Roads of the United States Department of Agriculture. It is believed that there is no sound reason for the present variation in methods of construction that now exists and that it results in greater cost of bridges. State officials take the same view as the Bureau and a committee composed of bridge engineers has been appointed by the American Association of State Highway Officials to consider the matter. A Manual of Practice is being prepared which will represent the best thought on the subject and which it is believed will be accepted by all the state highway departments. Not only will the question of such a manual lead to the building of bridges of good design, but it will also make possible a saving of money as bridge companies will not be called upon to meet a wide variation in design.

#### INFORMATION HARD TO GAIN

Statistics Concerning Roads of Different States in Some Cases Not Easily Obtained.

Prepared by the United States Department of Agriculture

While the amount of statistics for roads and bridges in the United States is increasing, the information that is available is not always easily obtained. The Bureau of Public Roads of the United States Department of Agriculture has been endeavoring to obtain the statistics of all states in the country and has been successful in obtaining the statistics of all states in the country. The statistics of all states in the country are now being compiled and will be published in a book which will be published in the near future.

Information of the department are now gathering complete information regarding the road mileage and expenditures in the United States. In many of the states, much of the information desired is easily obtainable from the state highway department. In the states where the figures were obtained almost immediately. In other cases it has been necessary to send out letters to the state highway departments and some

The Brocks-Lambert Road in Pennsylvania. Showing How It Appeared Before and After It Was Improved by a Concrete Road Bed.

These two photographs have been obtained from the Pennsylvania Highway Department and show the improvement in the road. The road is shown in two sections, with the improved section appearing much smoother and wider. The improvement was made by a concrete road bed, which has made the road much safer and more comfortable to drive on.

#### BRIDGES ON IMPROVED ROADS

Few Structures Less Than 10 Feet Are Now Being Constructed, Say Engineers.

Few highway bridges with a width of less than 10 feet are now being constructed on improved roads, according to engineers of the Bureau of Public Roads of the United States Department of Agriculture. In the past, many small bridges were built on dirt roads, but now that the roads are being improved, the need for small bridges is decreasing. Engineers believe that in the future, most bridges will be built on concrete road beds, which will make them much stronger and more durable.

#### Material for Good Roads

Federal and state, either completed or under construction in the United States at the end of the present fiscal year, will require approximately 50,000,000 tons of stone and gravel for the building of 20,000 miles of highway.

#### Farmer Begins to Compete

With the farmer, the small business man, and the industrial plant, the federal government is now beginning to compete for the business of the nation.

Prepared by the United States Department of Agriculture

In the study of root, stalk, and ear of corn, one of the most useful devices that has been made is a very simple difference between the two types of corn. The difference is in the shape of the ear and the way it is attached to the stalk. The two types of corn are known as dent corn and flint corn. Dent corn has a deep indentation in the center of the ear, while flint corn has a hard, glassy surface. The difference in the shape of the ear is due to the way the corn is grown. Dent corn is grown in the northern states, while flint corn is grown in the southern states.

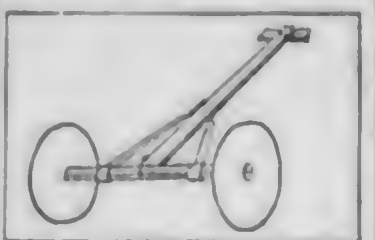

There is the most serious threat to the corn industry in the United States. The corn industry is facing a serious threat from the corn belt states. The corn belt states are the states of Iowa, Illinois, Indiana, Ohio, and Michigan. These states produce the majority of the corn in the United States. The corn belt states are facing a serious threat from the corn belt states. The corn belt states are facing a serious threat from the corn belt states. The corn belt states are facing a serious threat from the corn belt states.

There is an impression among corn growers that the depth of the dent is an indication of the quality of the corn. But this has not been shown to be true. The depth of the dent is not an indication of the quality of the corn. The quality of the corn is determined by the way it is grown. The corn belt states are facing a serious threat from the corn belt states. The corn belt states are facing a serious threat from the corn belt states. The corn belt states are facing a serious threat from the corn belt states.

#### DEVICE AIDS BERRY GROWER

Rolling Cutter Makes It Easy to Keep Strawberry Plants Confined to Allotted Space.

This device will be found handy in keeping the strawberry bed in order through the summer season. It is a rolling cutter used to cut the runners which otherwise would spread out between the rows and set plants where they are not wanted.

Rolling Cutter for Berries

D. H. Van Horn in the Nebraska Farm Journal. By running this roller up and down the rows, the runner which otherwise would spread out between the rows and set plants where they are not wanted.
